

General objectives and specific objectives for the year 2013

1. Management, technical assistance and implementation of the National Peripheral and Central Hematopoietic Stem cells Transplant Program

- 1.1. Creation and management of a computer database on the Romanian territory regarding the individuals who have given their consent to donate hematopoietic stem cells.
- 1.2. Coordinating the recruitment and registration in NRVHSCD of at least 3,000 hematopoietic stem cells donors aged between 18 and 60 years.
- 1.3. Coordination of testing of at least 3,000 hematopoietic stem cells donors.
- 1.4. Search and identification of compatible hematopoietic stem cells donors in our own database and in international databases, for all Romanian patients with indication for hematopoietic stem cells transplantation from an unrelated donor.
- 1.5. Coordination of hematopoietic stem cells sampling and transplantation activities from an unrelated donor.

2. NRVHSCD to fulfill and maintain the minimum requirements required by European and international standards in the field (standards of the World Marrow Donor Association - WMDA)

- 2.1. Maintaining certification for quality standards: ISO/IEC 9001:2008 - quality management system and for ISO/IEC 27001: 2005 - information security management system
- 2.2. Fulfilling the requirements and recognition as a member of international organizations in the field of activity: World Marrow Donor Association (WMDA), Europdonor - Bone Marrow Donors Worldwide (BMDW), European Group for Blood and Marrow Transplantation (EGBMT), European Federation for Immunogenetics (EFI).
- 2.3. Implementing standards of organization and operation
- 2.4. Defining and implementing standards for the professional training of the personnel involved.
- 2.5. Program design and implementation of SCIM

3. Implementing the interconnection of the National Register of Voluntary Hematopoietic Stem cells Donors with similar international organizations.

- 3.1. Establishing partnerships with similar international organizations
- 3.2. Implementing the functional interconnection (both for the donor and for patients with an indication for hematopoietic stem cells transplantation from an unrelated donor for whom no compatible donor has been identified in the Local Registry), with at least 8 registers in the European Marrow Donor Information System (EMDIS),

4. Search and identification of compatible hematopoietic stem cells donors in its own database, for foreign patients
